DETAILED ACTION

1. Applicant's election of Group I, claims 1- 26, and 44 - 66 in the reply filed on May 25th, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 27 - 43, and 67 - 94 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 25th, 2004.
3. Upon further review the following action is deemed merited. The examiner regrets the delayed prosecution of the claims.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group I, claims 1 - 21, drawn to a method of regularly replenishing supplies for providing at the site of a local computerized communications device a human readable list of items, classified in class 705, and subclass 26.
 - II. Group II, claims 22 - 26, drawn to a method of regularly replenishing supplies for communicating by telephone from a central installation by interactive voice response, classified in class 707, and subclass 001.

III. Group III, claims 44 - 66, drawn to a method of operating a centralized supply order processing site, classified in class 700, and subclass 243.

5. Inventions Group I, Group II, and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I, has separate utility such as supplying replenishment. Invention Group II, has separate utility such as for presenting a dynamic interactive interface to a user over a telecommunications network. Invention Group III, has separate utility such as for distributing supplies to customers. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
